Collection File to select - `thunderCollection-ContentFragments.json`

Environment File to select - `thunder-environment.json`

Screenshot after pasting the access token →

The screenshot shows the 'Update Environment' dialog box in Adobe Summit. The dialog has a title bar with 'TC Environment Variables' and a close button. The main content area is titled 'Update Environment'. It includes a text field for 'Name: Summit Lab 713 Sandbox' and a 'filter variables' button. A 'Save' button is located at the top right. Below this is a table with two columns: 'Variable Name' and 'Value'. The table contains the following entries:

Variable Name	Value
URL	https://author-p106439-e994728.adobecloud.com
TOKEN	eyJhbGciOiJSUzI1NiIsIng1dSI6Im1tc19uYTeta2V5LWF0LFEuY2Vyliwia2lkjoiaW1zX2...
TENANT	wknd-shared
PQ_EVENT_BY_SLUG	event-by-slug
variable	value

At the bottom of the dialog, there is a checkbox labeled 'Link to .env file' and a note 'Sort using drag & drop'.

Lab Tips & Tricks

Page 7 (yarn)

If you don't have yarn – > `npm install -global yarn`

If > `npm install` does not work after that, add the `node_modules` folder and then run

> `yarn start-ssl`

Lab Tips & Tricks

Page 11 or anytime you run into issues with loading assets

Click on a different folder and click back to the folder you want. That usually works

Page 13

When creating a variation, don't hit ENTER on your keyboard, please just click on the Create button instead.

If you run into this issue →

412 Precondition Failed

```
{ "type": "https://aem.api.adobe.io/problems/precondition failed", "title":  
"Precondition Failed", "status": 412, "detail": "The current eTag of the fragment with  
id L2NvbmYvd2tuZC1zaGFyZWQvc2V0dGluZ3MvZGFtL2NmbS9tb2RlbHMvZXZlbnQ is  
\\\"9303144d153a4bcdec11be7604c2619\\\"." }
```

Use the ID from this details message instead and make the call again and it will work.
